OPEN DAYS

Our Women's Health Open day in January 2019 was a huge success with over 150 patients attending in one morning!

This year we will also be holding Asthma, Diabetes, COPD, Hypertension and a Carers Morning - Look out for updates!

Meet Our Team

Krystian Dawiec - Consultant Physiotherapist and MSK Lead

My role is to offer you my expertise in assessing joints and muscle problems, I also manage chronic pain syndromes. I am qualified to prescribe medication for pain and joint problems, order investigations and refer to other specialists. Due to long waiting list for joint injections in secondary care, I started running an in house joint injection clinic

Patient Participation Group (PPG)

Our current PPG was formed in January 2018 we have eight members who attend monthly meetings at the practice, attend external meetings, help with the open days and they also come into the practice to talk to patients to obtain feedback to help us improve the services we offer.

The PPG carry out a vital role within the practice, they are all patients at the practice and are striving to have the voices of our patients heard.

So look out for them next time you are in the practice.

Appointments

In February 2019 we offered 3209 patients face to face appointments.

Thank you to all the patients who attended their appointments.

In February we had 345 pre-booked appointments wasted as patients did not attend and did not cancel their appointments

Friends & Family Data

78 % of our patients were happy with the service we provided in February 2019
